

VoiceAI For Leasing

Elise answers 41% more calls for leasing teams.

Elise VoiceAI handles all the leasing calls that would normally be missed or go straight to voicemail including after-hours calls.

Challenge

With leasing teams lean and call centers costly, managing the overflow of phone calls and requests requires additional effort, time, and money.

VoiceAI Solution

- Picks up overflow calls even when the line is busy
- Answers a wide range of questions from leads
- Schedules property tours
- Accurately routes calls when necessary

Result

VoiceAI enables leasing teams to handle more call volume and manages all overflow. Elise converts as well as their best call representative and gives prospects instant responses rather than sending them to voicemail.
