

PRODUCT OVERVIEW

# EliseCRM

Centralize data, streamline communication, and ensure seamless team integration and visibility across properties.

EliseCRM is an all-in-one platform that centralizes prospect and resident data, streamlines communications, and enhances workflows with AI-driven automation and secure document management. It integrates onsite and centralized teams, enabling efficient scheduling, targeted messaging, and complete visibility into interactions across properties.

### Centralized Communication Hub

EliseCRM consolidates all prospect and resident information into one platform, providing a complete view of every interaction and communication.

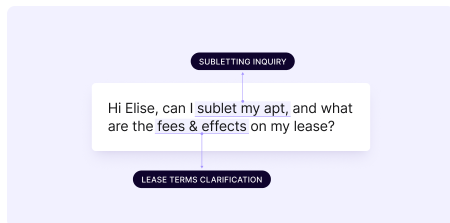

### Seamless Team Integration & Scalability

EliseCRM integrates onsite and centralized teams, allowing agents to support multiple properties, ensuring flexibility and scalability as your portfolio grows.

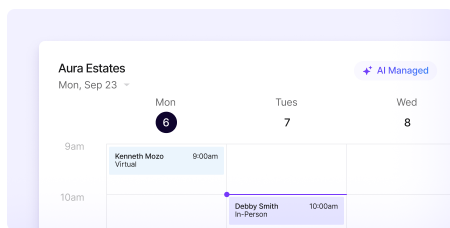

### AI-Enhanced Efficiency

EliseCRM's AI reduces handoffs by learning from team interactions, automatically updating information and streamlining workflows for a more efficient operation.

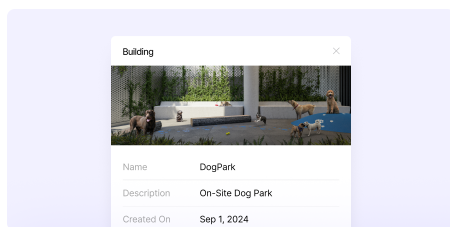

### Comprehensive Contact and Communication Management

EliseCRM's AI automatically pulls information from PMS systems, community forms, and agent conversations, reducing handoffs to on-site teams and enabling faster responses. Acting as a repository for new team members, EliseCRM eliminates downtime during transitions, maintaining a consistent, accessible knowledge base that supports smooth operations and continuity.

### Configurable Calendar and Centralized Scheduling

EliseCRM's fully configurable calendar allows leasing agents to manage multiple properties, supporting a centralized approach to scheduling. You can customize tour types, set showing limits, and organize agent assignments across communities, ensuring efficient resource allocation and maximizing your team's productivity.

### Streamlined and Secure Document Management

EliseCRM simplifies secure document sharing, allowing residents to submit work order photos and applicants to send income verification via email or SMS.
