

PRODUCT OVERVIEW

VoiceAI

Elise is a sophisticated, conversational AI assistant that manages 90% of your inbound and outbound calls across leasing and resident services.

VoiceAI is an advanced conversational AI tool that automates voice-driven interactions for leasing and resident communications, enhancing efficiency and engagement across all touchpoints.

Boost Engagement & Reduce Workload

Boost engagement and reduce operational strain with automated voice outreach across leasing, payments, and renewals.

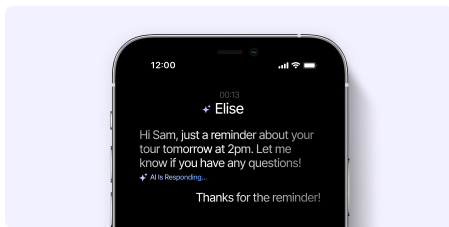

24/7 Availability

Reduce manual tasks and follow up with 24/7 call coverage for all leasing and resident inquiries.

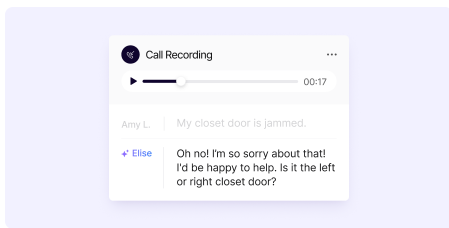

Centralized Reporting

Gain full visibility and streamline operations with automated call tracking, transcripts, and reports integrated directly into your CRM.

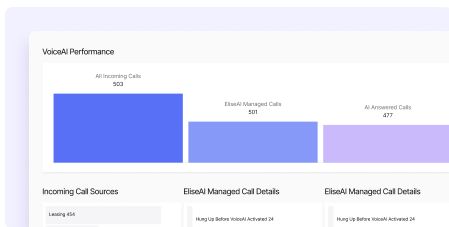

VoiceAI for Leasing

VoiceAI enhances your leasing process by automatically answering and calling leads to drive engagement and boost tour scheduling. With call recordings and transcripts available in your CRM, teams can track all interactions, ensuring no prospect falls through the cracks.

VoiceAI for Resident Services

Automatically answer calls and automate outreach with VoiceAI for rent reminders, maintenance requests, and lease renewals. Elise can remind residents about payments, handle callbacks, leave voicemails, and record conversations for your records.

Enhanced VoiceAI Reporting

VoiceAI integrates with your CRM, automatically recording and storing call transcripts for leasing, reminders, payments, and renewals. All interactions are organized in a single thread, providing quick access to call summaries, recordings, and data for easy tracking. This centralized reporting helps teams monitor performance and improve communication efficiency across the board.
